

Office of Utility Regulation

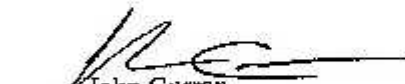

24th May 2011

To Whom it may Concern

Porting XS has approached the Office of Utility Regulation to provide a reference and I am happy to do so.

In May 2008 Porting XS was chosen by the three mobile operators in Guernsey and Jersey to support them in the implementation of Mobile Number Portability. MNP was successfully launched in the Channel Islands on 1st December 2008. The implementation was completed against a very tight timetable. The flexibility and versatility of the product offered by Porting XS, along with excellent support provided by Porting XS staff, contributed to the successful launch of MNP. The OUR has no reservation in recommending Porting XS.

Yours sincerely

John Curran
Director General
